Specialty Lubricant's Employees Proudly Display Their ISO 9001:2000 Flag

Congratulations are in order for Specialty Lubricants Corporation, located in Twinsburg, Ohio. On October 20, 2005 they received their certification to ISO 9001:2000 from QMI. During the flag ceremony on on December 21, 2005, Frank Novak (KAVON International President) and John Novak (KAVON Vice President) presented the ISO 9001:2000 flag to Robin Bugenske (Chief Executive Officer).

KAVON International, Inc. consultants assisted Specialty Lubricants Corporation in the identification of its processes, preparation of their ISO 9001:2000 documentation, and the training of their employees.

SPECIALTY LUBRICANTS Corp. has been marketing lubricants since 1979. Their California sister company, HUSK-ITT Corporation, has been manufacturing lubricants since 1944. Their present product line of industrial lubricants is sold under the HUSKEY brand, and marketed through Industrial and Bearing Distributors. Their SLIPKOTE brand is marketed for Automotive OEM and Aftermarket Sales.

SPECIALTY LUBRICANTS Corp. expanded into custom packaging of lubricants after they discovered that there was a void in quality packaging for private labeling. At this time, they also started producing portion pouches. The Lube-Pak®, as it was later coined, has become our most popular custom package to date for lubricants and other liquid and semi-solid products. Its most common uses are for service repair kits and sampling programs.

PRODUCTS AND TECHNOLOGY

In Lubrication:

Their lubricants forte, as their name implies, is specialty lubricants that take over where the finest oils and greases leave off. Their product lines should not be compared to conventional lubricants which are designed for general purpose lubrication. Both the HUSKEY and SLIPKOTE brand lubricants are designed as problem-solving lubricants, specially engineered to handle the most extreme lubrication conditions, such as high loads, high and low temperatures, water wash-out, chemical attack, and hydrodynamic lubrication starvation. They utilize all available technologies which include pure and semi-synthetics, highly refined mineral oils, specialized polymers, chemical additives, and boundary lubricants (natural EP agents) such as Molybdenum Disulfide, Graphite and Teflon. Their technological expertise to develop, manufacture and supply top quality lubricants, at competitive prices, has earned us an excellent reputation in this field.

In Packaging:

SPECIALTY LUBRICANTS Corp.'s Custom Packaging Plant provides a complete packaging service that is supported with sophisticated filling equipment to handle various liquids, greases, and other semi-solid products. Our packaging lines are designed to handle bottles, jars, squeeze tubes, syringes, cartridges and portion pouches (Lube-Paks).

Summary:

Their position as a lubricants manufacturer, through our sister company, as well as a quality custom packager, put us in a unique competitive position in meeting our customers' total lubrication requirements. It is SPECIALTY LUBRICANTS Corp.'s daily focus to service all its customers beyond their expectations by providing the highest quality products and services, delivered on time, and competitively priced, while paying strict attention to our customer's specifications and details.

*If your company is seeking registration or compliance to any of the Quality Management System standards such as ISO 9001:2000, ISO/TS 16949, AS9100, ISO 17025, ISO 14001, or ISO 13485, give us a call toll free at 888-637-9598 and let a team of our **Trusted Advisors** guide your organization in establishing successful Quality Management System support and implementation programs.*
